

The screenshot displays the JMeter GUI for configuring a REST API test. The left sidebar shows a project tree with a 'login' test under a 'TestSteps' folder. The main window displays the 'login' test configuration, including the endpoint 'https://petstore.swagger.io', the resource/method 'login -> Method 1', and the request body. The 'Request' tab shows a raw JSON request with 'username: deepthi' and 'password: Deepthi@2'. The 'Response' tab shows a raw JSON response with 'code: 200' and 'message: logged in user session:1748930632237'. The bottom status bar shows 'response time: 382ms (78 bytes)'.

The screenshot displays the Apache JMeter GUI. On the left, the 'Navigator' tree shows a test plan with a 'delete' test step. The main window is titled 'delete' and shows the configuration for this test step. The 'Endpoint' is 'https://petstore.swagger.io/v2/user/username' and the 'Method' is 'DELETE'. The 'Request' tab is selected, showing the request body as a JSON object. The 'Response' tab is also visible, showing the response body as a JSON object. The 'Custom Properties' tab is also visible, showing a table of properties.
